TRAINING & MENTORING

An Innovative way of Improving Knowledge and Skills

Fox IT is offering an affordable online membership program. 'ITSM Mentor' delivers professional development, career advancement, training courses and mentoring services. The membership provides the basis of knowledge advancement in IT Service Management, Project and Risk Management, IT Network Engineering, Cyber Security, Cyber Risk and Office applications.

This innovative approach to mentoring, training and certification delivers the following benefits to individuals and enterprises:

Overview

For only **€69** annual membership fee, individuals have unlimited access to

- IT, Cyber Security & Office Professional Career Pathway Certification & Mentoring Services for Individuals and Enterprises

- 1300+ career pathway video training programs that qualify students to sit for the following professional examinations:

- IT Service Management & Governance Certifications from Axelos and ISACA
- IT Project Management Certifications from Axelos, PMI and SCRUMstudy
- Cyber Risk Management Certifications from Axelos and PMI
- Cyber Security Certifications from ISACA, ISC², CompTIA and Mile2
- IT Network Engineering Certifications from Microsoft, Cisco CompTIA and VMware
- Office Professional Certifications from Microsoft

Benefits for the Individual Member

Over 1,300 Online Tutorials

Access to over 1,300+ online, on-demand video tutorials covering IT Networking and virtualisation, Cyber Security, Project Management, IT Service Management and Office Productivity Skills (including SharePoint and Office365)

Certificates of Completion

Each of the courses includes a questionnaire on the new knowledge that you have acquired. Passing this at 80% or over will earn a digital certificate of course completion.

Accredited Training Material

All the course materials form the delivery part of our accredited training portfolio. These videos are the ones used for industry qualifications such as: PMP, ITIL, PRINCE2, CCNA, A+, Network+, CISSP, ACP, VMware, MCSE, CCNP, MOS and many more! Use these as a springboard (at reduced cost) for professional training

Official InfoSec Training

Members have access to over 100+ Mile2 Official InfoSec and Cyber Security training courses. National Security Agency (NSA) has endorsed Mile2 coursework

Review Questions

There's over 10,000+ review questions that assess participation and understanding of the course

Mobile Learning

On Demand, online, anytime access to the training material so you can keep enhancing your knowledge at any time on any device!

Growing Library of Content

New courses are continuously being added and members will have automatic access as part of their membership

Customer Support

Priority Customer Support via phone, email and live chat resolving technical issues so learning progress isn't impacted!

Ongoing Mentoring and Guidance

Mentoring support from our experts is provided with membership giving answers to any questions and relevant guidance to facilitate deeper learning!

Benefits for the Individual Member

Faster Implementation of projects

Usually projects are kicked off on management decisions and resource capability tends to be 'on the job' as the project unfolds. Rapid learning coordinates capability, communication and understanding to a wider community that is usually learn post implementation – delaying potential returns on your investment

Improving Employee Competency

Raising employee skills and capability accelerates their individual tasks, raises team ability, improves departmental service quality... ultimately improving customer satisfaction!

Reduce Support Costs

End-user training on business applications (MS Office, SharePoint, Office 365 etc) would significantly reduce the calls into the support team. This means that IT can focus on quality, technology & innovation.

Measurable skills across the organisation

Enterprise membership allows for the introduction of KPIs to ensure high quality knowledge and compliance policies (e.g. basic security knowledge) across the business

Manage Risk & Employee Behaviour

Mitigate the risks your business could be exposed to through lack of competence and security issues through wider training and achieving minimum security knowledge across the enterprise

Increase Project Success Rates

The success of many projects is determined by the rate of adoption and active usage post deployment. Acceptance and uptake is dependent on early communication, training and understanding of key principles across a wider user base than traditional training budget allows.

Develop Talent within your Business

Developing talent within your business creates higher morale, higher skills in the context of your business and of course, is much cheaper and quicker than buying it in. Our membership provides an enterprise platform for identifying talent and developing it further.

Less On the Job Time Learning

Enterprise membership drives behaviour where more time is dedicated to business activities rather than organised training or 'on-the-job' learning. This results in increased productivity and greater resource efficiency

A Fraction of your Training Budget

Our membership delivers accredited training courses across a wider significantly wider audience at a fraction of your training budget and introduces a corporate wider improvement in skills, knowledge and competency.

Additional Steps to Learning

Further to the extensive number of courses included as part of your membership - choose to take it one step further and deepen your learning through our study kits, available for most of the courses and obtain professional, industry qualifications by sitting exams - all available through Fox IT.
